

## CALCheck-S

CALCheck-S is a microcontroller based mili volt source.

### FEATURES

- Microcontroller based logic
- Compact
- Programming through membrane keys

### SPECIFICATION

Model	: Calcheck-S
Power on facility	: ON/OFF switch
Output range	: 0mV - 99.99mV
Accuracy	: + 0.05 mV DC
Least count	: 0.01
Operating Temperature	: 0 to 55°c
Display	: 4 digits Seven Segments LCD
Power supply	: 9V transistor radio battery
Dimensions	: 183(L) x 104(W) x 45(H)
Humidity	: <70%
